

Implanr — Role-Based Workflow Reference (V2)

Dental College App & Dental Clinic App

Overview

Implanr operates on a role-based access system. Every user is assigned a role at signup, and their role determines what they can see, what they can do, and what requires approval from someone senior. The workflow is structured around a 4-phase case lifecycle — from initial diagnosis through to final prosthetic rehabilitation.

Both the Dental College App and the Dental Clinic App follow the exact same 4-phase workflow. The only differences are the role names and the removal of the Student role in the Clinic version.

Role Overview

Dental College App

Role	Who is this?
Implant In-Charge	Senior faculty. Full control over everything in the system. Final approver for all phases. Self-approved — can create and manage cases without requiring anyone else's approval.
Supervisor	Faculty member. Reviews and approves student cases at every phase before submitting to In-Charge. Can also create own cases.
PG / UG Student	Creates and manages patient cases under supervisor guidance. Submits each phase for approval.
Nurse	Clinical support. Cannot create cases. Handles consent forms and instrument sterilisation.

Dental Clinic App

Role	Who is this?	College Equivalent
Chief Dentist / Owner / Admin	Clinic owner or senior dentist. Full control. Final approver. Self-approved.	Implant In-Charge
Dentist / Consultant	Associate dentist. Creates and manages own patient cases. Submits to Chief Dentist.	Supervisor
Dental Assistant	Clinical support. Cannot create cases. Handles consent and instruments.	Nurse

There is no Student role in the Clinic App. The Dentist directly manages their own cases and submits each phase to the Chief Dentist for approval.

The 4-Phase Case Lifecycle

Every case goes through 4 phases. Each phase must be completed and approved before the next phase unlocks.

Phase 1 – Diagnosis & Treatment Planning
Student submits → Supervisor approves → Implant In-Charge approves → Phase 2 unlocks

Phase 2 – Implant Surgery
Student submits → Supervisor approves → Implant In-Charge approves → Phase 3 unlocks

Phase 3 – Healing & Second Stage Surgery
Student submits → Supervisor approves → Implant In-Charge approves → Phase 4 unlocks

Phase 4 – Prosthetic Rehabilitation
Student submits → Supervisor approves → Implant In-Charge approves → Case Complete

Both Supervisor and Implant In-Charge must approve at every phase. The Supervisor reviews first, then the Implant In-Charge gives final approval. The next phase only unlocks after the In-Charge approval.

Special Case: Existing Implants Procedure Type

When the procedure type selected is Existing Implants, Phase 2 is skipped entirely. The case moves directly from Phase 1 to Phase 3 or Phase 4 depending on what is clinically relevant.

Phase 1 – Diagnosis & Treatment Planning
(Phase 2 skipped)
Phase 3 – Healing & Second Stage Surgery OR Phase 4 – Prosthetic Rehabilitation

Case Assignment

Currently: When creating a new case in Phase 1, the student selects their assigned Supervisor and Implant In-Charge from a dropdown list.

Planned: Some colleges may require that the Implant In-Charge or Supervisor assigns cases to students directly, rather than students choosing. This will be configurable per institution.

Dental College App — Detailed Role Workflows

Role 1: Implant In-Charge

Who uses this: Head of the implant department or senior faculty responsible for overseeing all cases in the college.

Key privilege: Self-Approved

Cases created by the Implant In-Charge do not require any other approval. They can proceed through all phases directly.

Edit History

Every edit made to any case — regardless of who makes it — is automatically saved in the case's edit history. The Implant In-Charge can review the full edit trail at any time.

What they can see

- Every case in the system regardless of who created it
- Full patient data across all 4 phases
- All user accounts and full audit trail
- Student progress and supervisor performance summaries

Screens and access

Section	Access
Home Dashboard	Full view — all pending approvals, recent activity
New Case	Can create cases (self-approved)
Implant Library	Full access — add, edit, delete implant systems
My Cases	Sees all cases in system
Alerts & Notifications	Yes
User Management	Add / remove / edit users, change roles
Archived Cases	Yes
Forum	Yes
What's New	Yes
Student Profiles	View individual student progress
Supervisor Summaries	Yes
Audit Log	Yes
Implant Database	Full edit access

What they can do

- Create new patient cases — self-approved, no external approval needed
- View, edit, and manage any case at any phase at any time
- All edits automatically recorded in case edit history
- Approve or reject case submissions at every phase
- Add, edit, and remove implant systems from the catalog
- Add or remove users and change user roles
- Archive and restore cases, export full case PDF reports
- Use all AI features — Smart Planner, Ask Implantr, ImplantLens
- Send push notification nudges to supervisors and students
- View complete student progress analytics and supervisor summaries
- Review and resolve Phase 2 edit requests

Approval responsibilities

The Implant In-Charge is the mandatory final approver at every phase. A phase does not unlock until the In-Charge explicitly approves — even if the Supervisor has already approved.

Phase submission	Action required
Phase 1 submitted (after Supervisor approval)	Review → Approve or Reject → Phase 2 unlocks
Phase 2 submitted (after Supervisor approval)	Review → Approve or Reject → Phase 3 unlocks
Phase 3 submitted (after Supervisor approval)	Review → Approve or Reject → Phase 4 unlocks
Phase 4 Step 1 submitted	Review → Approve or Reject
Phase 4 Step 2 submitted	Final approval → Case marked Complete

Role 2: Supervisor

Who uses this: Faculty members assigned to specific students, overseeing their cases across all 4 phases.

What they can see

- Their own cases
- Cases of students assigned to them
- Cannot see cases belonging to other supervisors' students

Screens and access

Section	Access
Home Dashboard	Own activity + assigned student case summaries
New Case	Can create own cases
Implant Library	Read-only
My Cases	Own + assigned student cases
Alerts & Notifications	Yes
Archived Cases	Yes
Forum	Yes
What's New	Yes
Implant Database	Read-only
User Management	No
Audit Log	No

What they can do

- Create and manage their own patient cases
- Review and approve or reject student submissions at every phase
- Add review notes when approving or rejecting
- Request edits at any phase with specific instructions back to the student
- After approving, submit the case to Implant In-Charge for final approval
- Upload consent forms, case photos, and CBCT scans
- Export case PDF reports and use all AI features
- Participate in the forum and schedule case appointments
- View drilling protocols for selected implants

What they cannot do

- View or edit cases not assigned to them
- Give independent final approval — Supervisor must approve at every phase (Phase 1 through Phase 4), but Implant In-Charge approval is also mandatory before the next phase unlocks
- Add or remove users, edit implant catalog, or view audit logs

Approval workflow

Phase 1:
 Student submits → Supervisor reviews → Approves or Rejects
 If approved → Supervisor submits to In-Charge → In-Charge approves → Phase 2 unlocks

Phase 2:
 Student submits → Supervisor reviews → may request edits → Approves
 Supervisor submits to In-Charge → In-Charge approves → Phase 3 unlocks

Phase 3:
 Student submits → Supervisor reviews → Approves
 Supervisor submits to In-Charge → In-Charge approves → Phase 4 unlocks

Phase 4:
 Student submits → Supervisor reviews → Approves
 Supervisor submits to In-Charge → In-Charge final approval → Case Complete

Role 3: PG Student/Fellow/UG Student

Who uses this: Postgraduate or undergraduate dental students conducting implant cases under faculty supervision.

What they can see

- Only their own cases
- Cannot see anyone else's cases

Screens and access

Section	Access
Home Dashboard	Own cases summary, upcoming appointments
New Case	Can create cases
Implant Library	Read-only
My Cases	Own cases only
Alerts & Notifications	Yes
Archived Cases	Yes
Forum	Yes
What's New	Yes

Section	Access
Implant Database	Read-only
User Management	No

What they can do

- Create new patient cases and select procedure type
- Select assigned Supervisor and Implant In-Charge from dropdown during case creation
- Fill all phase data across Phase 1 through Phase 4
- Use AI Smart Planner for implant suggestions per tooth site
- Override AI suggestions with a safety acknowledgment
- View auto-generated drilling protocols for selected implants
- Submit phases for approval up the chain
- Upload consent forms, case photos, and CBCT scans
- Request edits at any phase
- Use Ask Implanr
- Export case PDF once case is complete

What they cannot do

- Edit a submitted phase (locked until approved or rejected)
- View other students' cases
- Approve or reject anything
- Manage users or catalog

Full case workflow

Phase 1 — Diagnosis & Treatment Planning

1. Create new case and select procedure type
2. Select assigned Supervisor and Implant In-Charge from dropdown
3. Enter patient details — name, age, registration number, medical history
4. Select arch and mark missing teeth on tooth map
5. Enter bone dimensions (height, width, density)
6. AI Smart Planner suggests implants per tooth site
7. Review and confirm — override with safety acknowledgment if needed
8. Drilling protocol auto-generates for chosen implants
9. Submit for Supervisor approval
10. If rejected: review notes, correct, and resubmit
11. If Supervisor approves: case goes to In-Charge for final approval
12. If In-Charge approves: Phase 2 unlocks

Phase 2 — Implant Surgery

1. Fill surgical planning data and augmentation checklist
2. Upload signed patient consent form
3. Document pre-surgical assessments and submit
4. Supervisor reviews → may request edits → approves → submits to In-Charge

5. In-Charge approves → Phase 3 unlocks

Phase 3 — Healing & Second Stage Surgery

1. Document healing period observations
2. Document second stage surgery details and clinical findings
3. Upload photos and submit
4. Supervisor reviews → approves → submits to In-Charge
5. In-Charge approves → Phase 4 unlocks

Phase 4 — Prosthetic Rehabilitation

1. Document prosthetic rehabilitation steps
 2. Record impressions, abutment selection, crown / prosthesis placement
 3. Submit Phase 4 Step 1 → Step 2
 4. Supervisor approves → In-Charge gives final approval
 5. Case status changes to Complete — export full PDF case report
-

Role 4: Nurse

Who uses this: Clinical nurse supporting the implant team. No clinical case decisions.

What they can see

- Scheduled cases list and surgery calendar
- Phase 1 patient information only (name, scheduled date, basic info)
- Cannot see Phase 2, 3, or 4 clinical data

Screens and access

Section	Access
Home Dashboard	Calendar + scheduled cases only
Cases	Read-only list
New Case	Hidden
Implant Library	Hidden
Alerts & Notifications	Yes
Forum	No
Archived Cases	No

What they can do

- View surgical calendar and upcoming appointments
- Upload signed patient consent forms to a case
- Mark surgical instruments as autoclaved
- Receive push notification reminders before scheduled surgeries
- View basic patient info for surgical preparation

What they cannot do

- Create or edit cases
- View Phase 2, 3, or 4 data
- Approve or reject anything
- Access forum, archive, user management, or implant catalog

Dental Clinic App — Detailed Role Workflows

All workflows are identical to the College App. Role names are different and the Student role does not exist. The Dentist fills the Supervisor role — creates cases and submits each phase to the Chief Dentist for approval.

Role 1: Chief Dentist / Owner / Admin

Who uses this: The clinic owner or most senior dentist overseeing all cases.

Identical to Implant In-Charge in the College App.

Key privilege: Self-Approved

Cases created by the Chief Dentist are self-approved — no other approval needed.

Edit History

All edits to any case are automatically saved in edit history.

What they can see

- Every case in the clinic
- Full patient data across all 4 phases
- All staff accounts and full activity and audit history

Screens and access

Section	Access
Home Dashboard	Full view — all pending approvals, clinic activity
New Case	Yes (self-approved)
Implant Library	Full access — add / edit / delete
My Cases	All clinic cases
Alerts & Notifications	Yes
User Management	Yes
Archived Cases	Yes
Implant Database	Full edit access
Forum	Yes
What's New	Yes
Audit Log	Yes

What they can do

- Create and manage any case — self-approved
- View and edit any case from any dentist, at any phase, at any time
- All edits recorded in edit history automatically
- Approve or reject submissions at every phase
- Add / edit / remove implants from catalog
- Add / remove staff accounts and change roles
- Archive and restore cases, export case PDF reports
- Use all AI features and send notifications to dentists

Approval responsibilities

Phase submission	Action required
Dentist submits Phase 1	Review → Approve or Reject → Phase 2 unlocks

Phase submission	Action required
Dentist submits Phase 2	Review → Approve or Reject → Phase 3 unlocks
Dentist submits Phase 3	Review → Approve or Reject → Phase 4 unlocks
Dentist submits Phase 4	Final approval → Case Complete

Role 2: Dentist / Consultant

Who uses this: Associate dentists or consultants managing their own patient cases.

Identical to Supervisor in the College App.

What they can see

- Their own patient cases
- Cases assigned to them by the Chief Dentist
- Cannot see other dentists' cases

Screens and access

Section	Access
Home Dashboard	Own cases summary
New Case	Yes
Implant Library	Read-only
My Cases	Own cases
Alerts & Notifications	Yes
Archived Cases	Yes
Implant Database	Read-only
Forum	Yes
What's New	Yes
User Management	No

What they can do

- Create and manage their own patient cases
- Fill all 4 phases of the case workflow
- Submit each phase to Chief Dentist for approval
- Upload consent forms, case photos, and CBCT scans
- Use all AI features — Smart Planner, Ask Implanr, ImplantLens
- Export case PDF reports, view drilling protocols, schedule appointments

What they cannot do

- View other dentists' cases
- Give final approval — Chief Dentist must approve every phase
- Add or remove staff accounts or edit the implant catalog

Full case workflow

Phase 1 — Diagnosis & Treatment Planning

1. Create new case and select procedure type
2. Enter patient details, arch, missing teeth, bone dimensions
3. AI Smart Planner suggests implants per site — review and adjust if needed

4. Drilling protocol auto-generates
5. Submit Phase 1 to Chief Dentist
6. If approved → Phase 2 unlocks

Phase 2 — Implant Surgery

1. Fill surgical planning and augmentation checklist
2. Upload consent form and pre-surgical data
3. Submit to Chief Dentist — if approved → Phase 3 unlocks

Phase 3 — Healing & Second Stage Surgery

1. Document healing period and second stage surgery
2. Upload photos and submit to Chief Dentist
3. If approved → Phase 4 unlocks

Phase 4 — Prosthetic Rehabilitation

1. Document prosthetic steps and submit Phase 4 Step 1 → Step 2
 2. Chief Dentist final approval → case marked Complete
 3. Export full PDF case report
-

Role 3: Dental Assistant

Who uses this: Clinical assistant supporting the dental team.

Identical to Nurse in the College App.

What they can see

- Scheduled cases calendar and upcoming appointments
- Phase 1 basic patient info (name, scheduled date)
- Cannot see Phase 2, 3, or 4 clinical data

Screens and access

Section	Access
Home Dashboard	Calendar + upcoming appointments
Cases	Read-only list
New Case	Hidden
Implant Library	Hidden
Alerts & Notifications	Yes

What they can do

- View surgery calendar and upcoming scheduled procedures
- Upload signed patient consent forms
- Mark instruments as autoclaved
- Receive pre-surgery reminder notifications

What they cannot do

- Create or edit cases
- View any clinical phase data
- Approve or reject anything

- Access user management, implant catalog, or admin screens

Implant catalog	Identical	Identical
PDF export	Identical	Identical
Edit history	Identical	Identical

Notification & Alert System

Event	Who gets notified
Case submitted for Supervisor review	Assigned Supervisor
Supervisor approves — sent to In-Charge	Implant In-Charge / Chief Dentist
Case approved (phase unlocked)	Case creator
Case rejected at any phase	Case creator (with rejection notes)
Edit request raised	Relevant party
Pre-surgery reminder	Nurse / Dental Assistant + operating dentist
Nudge from In-Charge	Supervisor / Dentist
New forum activity	All forum participants
Session timeout (15-min inactivity)	Current logged-in user

Security & Compliance

Feature	Detail
Auto-logout	Session expires after 15 minutes of inactivity on any device
Screenshot prevention	HIPAA-compliant screen capture blocking on iOS and Android
Audit trail	Every action logged with user identity, timestamp, and case reference
Edit history	Every case edit automatically recorded, viewable by In-Charge / Chief Dentist
Data in transit	HTTPS enforced across all API communications
Data isolation	Users can only access data their role permits
Authentication	Token-based login with automatic silent token refresh
